

CSE463 – Human Computer Interaction  
Module 4 - Heuristic Evaluation

Ideally, use the website you have picked for your final project. You will use the Usability Review Template designed by Neil Turner (UX designer) to conduct a heuristic evaluation. **Make sure to include comments explaining the values.**

After completing the heuristic evaluation, create a document conveying the results. At a minimum, the document should have the following:

- A summary of the website and the overall findings from the analysis.
- Details on specific problem areas and an explanation of how the issues relate to the concepts we have covered in class.
- Suggest improvements that may address the problem areas.
- Offer suggestions on what metrics you might use to evaluate whether the suggestions were effective.

Please, create a SINGLE PDF file with both the excel spreadsheet and the analysis. Please put use the following format for the files:

LASTNAME\_FIRSTNAME\_ASSIGNMENT4.PDF
